

RESUME

January, 2004

Mark C. Hendricks

61 Lacam Circle

Sacramento, CA 95820

Phone: (916) 737-7441

Cell: (415) 269-0878

Email: markhend@concentric.net

SPECIALTIES:

Video Editing and Production.

Computer Systems; Hardware Drivers.

Software & Utilities Development. Custom Installations.

OBJECTIVE:

Position as a **Video Editor**, Photographer or Audio/Video Engineer.
Full- or Part-Time.

WHAT I DO:

I currently have a **business producing video**, and have an extensive background in engineering and computer programming. I enjoy working on the "special" projects such as optimization, debugging, documentation, analysis, installation, etc., and am good at integrating systems. I can work at home part of the time and am set up to do that., and therefore can accept full- or part-time work. I am highly productive and learn new systems quickly.

EDUCATION:

B.S. Physics, Harvey Mudd College, Claremont, CA

Ph.D. Elec. Engr., Univ. of Denver, Denver, CO

VIDEO:

Editing and Production on **Media 100** xs / Boris Red. Analog and Digital.

Camera experience on Sony UVW-100K (Betacam SP) and PD150 (DVCAM).

EXPERIENCE:

8/98 – present

Video Producer / Editor

Hendricks Video – my own business

I started up this business to do video production (photography, graphics and editing) commercially, and to produce low-budget features and shorts. I have my own professional editing system and worked with two partners on projects. I can also produce educational, training or sales videos for your company.

4 Years experience Editing on Media 100 xs (currently 8.0). Also proficient using Boris Red (2.5) for titling, transitions, special 3-D effects, etc. Proficient in restoring / importing still photos into movies. Knowledgeable in Digiting, Sound Editing, and Tape Mastering.

I performed all hardware and software installations and maintenance, system backups, etc. I have also assisted other editors in producing their work on my system.

I can also do camera work (Betacam SP and DVCAM).

1/01 - 4/01

Contract Programmer
Streaming21, Los Gatos, CA

Consolidated and updated installations for the company's six major products. Analyzed module interdependencies and requirements. Helped develop automated build processes.

1/00 - 7/00

Contract Programmer
Molecular Dynamics, Sunnyvale, CA

Responsible for Installation and special builds of the company's major software products. Handled issues relating to shared components and independent releases.

2/95 - 5/99

Contract Programmer
Visioneer, Inc., Palo Alto, CA

Was responsible for the Installation (Setup) program for the company's PaperPort (scanner) Software on Windows 9x and NT platforms, automation of the build process, and support for multiple languages. Wrote various Windows utilities, Uninstall program, Update installer, and C-language subroutines.

3/92 - 6/94

Contract Programmer
Communication Intelligence Corp., Redwood Shores, CA.

Part of team developing PenDOS Versions 1 and 2. Wrote hardware drivers for Pen digitizer systems, plus driver developer's kit. Was responsible for Japanese (NEC) version of software. Represented company on 2 trips to Tokyo. General consulting, bug fixing & driver development.

3/87 - 3/92

Senior Programmer/Analyst and Contract Programmer,
WordStar Intl. (formerly MicroPro) Novato, CA.

Program development and troubleshooting for WordStar. Did advanced debugging and graphics programming. Completed development of the "Page Preview" system for WordStar. Supported font database and did scalable font development. Programmed in Assembly language and "C".

(for work history prior to 1987, please see the complete resume at www.markhend.cnc.net/resume).
